

NZAYISENGA EMMANUEL

Full-Stack Software Engineer

emmykeen2001@gmail.com • +250 728012395 • Rwanda

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 4+ years of experience across both frontend and backend development, and a deep passion for creating intuitive and engaging user experiences. Specialises in building scalable applications using React (Vite) and Node.js, while ensuring high performance, clean architecture, and user-centred design.

EXPERIENCE

Software Developer — UrutiHub

2024 – Present

- Developed full-stack platforms using React (Vite), Node.js, and PostgreSQL, delivering scalable digital products for clients across multiple industries.
- Built and maintained production applications end-to-end, from database design and API development to responsive, user-centred frontend interfaces.
- Collaborated with cross-functional teams to ship features, optimise performance, and ensure clean, maintainable architecture.

EDUCATION

University of Rwanda — B.Sc. Computer Science

Fresh Graduate

SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React.js, Vite, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js

Databases: MongoDB, PostgreSQL, SQLite, Firebase

Design: UX/UI Design, Figma

DevOps: Docker, Container Orchestration, Linux Server Admin, Git & GitHub, Pipelines

PROJECTS

Skol Football (skolfootball.rw) — Football Prediction & Fan Experience Platform

Built and deployed skolfootball.rw for Skol Brewery Rwanda — an interactive platform that lets fans predict match outcomes and win prizes, while also offering curated travel packages so supporters can fly to the home of champions and experience live football firsthand. Features include a real-time prediction engine, leaderboard, automated winner selection, and a seamless trip-booking flow, all wrapped in a mobile-first responsive UI.

Twagiye Morocco — AFCON Winner Selection Platform

Created a draw platform for Skol Brewery Rwanda to randomly select winners for a trip to watch the Africa Cup of Nations, implementing a fair and transparent algorithm.

AM Promo — Promotional Winner Selection Platform

Developed a digital platform for Airtel Rwanda to manage promotional campaigns and randomly select winners, ensuring a secure and transparent selection process.

Ikoru House (ikorohouse.com) — Hospitality Management Platform

Built a web platform for Ikoru House to manage hotel services, bookings, and online presence with a responsive UI across devices.

Urutiq Accounting Platform (urutiq.com)

Contributed to the development of Urutiq, a business accounting and financial management solution used by Rwandan companies including Flames Holding.

ACHIEVEMENTS

- 1st Place — Hanga Pitch Hackathon 2024 (organised by Rwanda Information Society Authority and Rwanda ICT Chamber) for building an AI-powered innovation that addressed real-world community challenges.

CERTIFICATIONS

- JavaScript Algorithms and Data Structures — FreeCodeCamp
- Responsive Web Design — FreeCodeCamp
- React.js Development Training — Energy Power Tech Solution Ltd.
